

Environmental Education Standard

Grade Level: K

Standards: B.4.5 – 4.6 Students will identify and distinguish between natural and human-made environments, and how organisms adapt to those environments.

Activity Example: Graph Animals, Project Wild, P. 49 Students will create a picture collection of animals in two different habitats, and then “visit” the habitats on where these animals are located.

Environmental Education Standard

Grade Level: K

Standards: A.4.1-4.3, B.4.12, D.4.1-4.6 Students will identify and make predictions, record observations, and draw conclusions of their natural world. Students will identify the different types of pollution and their causes. Students will identify an environmental problem, develop a solution, and take action to influence others about the problem.

Activity Example: Playing Lightly on the Earth, Project Wild, P. 432
Students will distinguish between games that are damaging and non damaging to the environment.
